Personal Statement

I am an 20 year old student and I am currently studying a Computer Science degree in university as an undergraduate, I am currently going into the second year of my course, I am very keen to learn new skills, I am very punctual, and good at time keeping, and can work in a team and I would like the chance to be able to gain experience within the job, my technical knowledge, skills and my organisation skills for example with my university course assignments I meet deadlines by completing the assignment as soon as the it has been released to prevent an overload of work and in order to help me to complete my assignments, I revise certain terms and concepts by re-watching the lectures online or using other online material in order for me to complete my assignments easier. In my College courses I have completed work experience which was mandatory to move onto the second year of my BTEC Level 3 Extended Diploma in IT course, the company I worked with is called TP Systems (now called CoRE Educational Ltd), as an IT Solutions Assistant and my job was to help and assist anyone of the employees that needed help, for example: I was sent to assist in a school by setting up iPads for the students, I was sent to another school to replace a faulty server. I also have 2 years of experience in retail: working on the tills, organising stock on the shop floor and in the stock room, ensuring the stock delivery is organised and disposing of the packaging of the stock.

Core Skills

My Core Skills:

- Punctuality
- Keen and enthusiastic learner
- Team Worker
- Good Listener

Qualifications

GCSE's

Mathematics, Grade 4

English Language, Grade 5

English Literature, Grade 4

History, Grade E

Science, Grade D

French, Grade D

Business Studies, Grade F

BTEC's

BTEC Level 2 First Extended Certificate in Information and Creative Technology, Pass

BTEC Level 3 Extended Diploma in IT, Pass

Education

BTEC Level 2 First Extended Certificate in Information Technology

September 2017 — June 2018

Newcastle and Staffordshire Colleges Group

This 1-year course is all about understanding the basics in technology, the areas that I studied in were: graphics design, database, software, website design etc.

BTEC Level 3 Extended Diploma in IT

September 2018 — June 2020

Newcastle and Staffordshire Colleges Group

This 2-year course is all about understanding how computers work and developing skills in areas such as software development, website production, networking and 2d games design.

Computer Science Bsc(Hons)

September 2020 — June 2024

Staffordshire University

This 4-year course is all about understanding how computers are made, the different types of Operating Systems computers ran on, e.g., FreeBSD, understanding different computer protocols, network design, learning Bash, creating websites, software application development.

Interests

- My interests involve computing but specifically programming as it gives me the freedom to do what I want for example: to create a website, a program to complete a specific task and to create a game.
- Another interest of mine is in Artificial Intelligence because of the way of training a neural network model to be able to complete a task without the need for human intervention and to even complete the task more efficiently than a human can.
- I also enjoy socialising with my friends and family because we go to the cinema, family days out and going out for meals. Another interest of mine is to simply learn, in terms of learning new information and learning new ways to complete a task or to reach a goal.
